

After Care Instruction - White Fillings

Your anesthesia will wear off in approximately 1 to 3 hours after the procedure. It is very important not to chew on the numb side (to prevent biting tongue, lip, etc.) until the anesthesia wears off.

Your tooth (or teeth) may be sensitive to hot, cold or pressure from the procedure. This is COMPLETELY normal. The more invasive the procedure, the more sensitivity you may experience. The possible symptoms of hot, cold or pressure will cease within a few days to a couple of weeks. In very few instances, this sensitivity could last longer than a couple of weeks. As long as your teeth or gums are continuing to feel better, (not staying the same, or getting worse) everything is fine. There is no need for concern.

Once the anesthesia has worn off and you feel as though any of the teeth we have worked on are hitting first, please give the office a call immediately. This imbalance with your bite may cause further discomfort and should be adjusted.

If you have any questions or concerns, please call us at 319-824-6948
